## Shark Tells Competitor

# "RUN FOR YOUR LIFE!"

Local distributors are fleeing Florida in droves after they spotted A&M's Great White shark stirring things up again.

Sources say this year's man-eating shark is even bigger than last year's!

Distributors across the state are on the alert ever since the A&M shark showed up in territorial waters north of Cuba. This time, the shark showed little mercy, slashing prices on dozens of items. One particular distributor was so shaken by the shark alert he packed his bags and moved to Toledo. His whereabouts are still unknown.

Fishermen who live along the coast say it's impossible to catch the A&M shark while

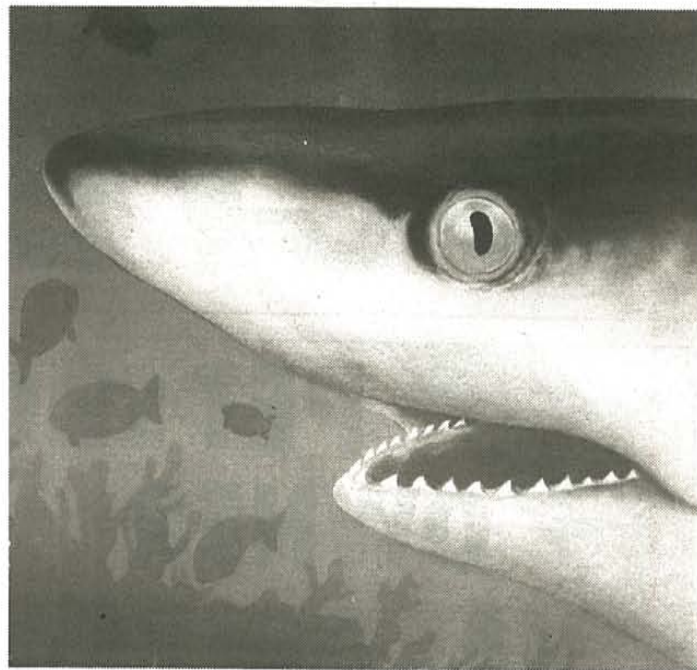

it feeds by day. Many fear it will devour anything that stands in its way.

"It's a veritable feeding frenzy," an insider told the Scea&mer. "That shark is bigger than I ever imagined. I'm afraid the worst is yet to come."

Many insist the shark is friendly to outsiders, particularly cabinetmakers in search of a good deal. One proud A&M customer noted, "I've never been happier since that shark returned. If I had it my way, I'd just as soon keep him around all the time."

Rumors are flying high about A&M's attempt to breed more sharks of this magnitude. Marine biologists studying the shark are puzzled by its appetite for distributors and continue to warn they're in grave danger. "All distributors - big and small - need to be on the lookout for more shark sightings," said a biologist close to the source. "We're convinced there will

be future sightings by the A&M shark sometime within the next 90 days."

# Senator Admits He Used Mettle Mica with New York Anchorwoman

**TWO DAYS after he voted against a cap on spending, Senator A.J. Honeycutt admitted he used Mettle Mica and would do it again if given the chance!**

After the Screa&mer learned his exclusive New York office was remodeled by a Florida cabinetmaker recently, Honeycutt made a public announcement espousing the virtues of Mettle Mica. Sources say WTLC Newswoman Sharon Darby was involved in the coverup!

"All I can say is keep an open mind about it," Honeycomb revealed during a press conference. "We both recommend using it as a decorative accent and we stand by our statement."

Honeycutt had his office redone with solid brass, although he admitted he toyed with the idea of choosing an aluminum substrate because of its "softer undertones."

"Big deal, so I used it on a couple of table bases," Honeycutt said. "I got nothing more to say."

Insiders told the Screa&mer that Honeycutt knows numerous cabinetmakers that use Mettle Mica as an accent for store fixtures, display cases, wall panels, mirror frame inserts, chair or sofa sides, decorative columns, trade show displays, and kick plates. "It's time we got the word out about Mettle Mica," said manufacturer's rep Ted Provencher. "Before you blame me about going public with this thing, talk to the folks at A&M Supply. It's time you heard the truth."
