\$8,934.00

The Benefits of IP versus ISDN ...

Internet Protocol (IP)

- Runs on your network; no per-minute costs
- Easy to use and learn
- Rich media integration; convergence of voice, video and data on a single network
- Simplified installation and setup

ISDN

- ISDN line may cost up to \$1.50 a minute; also expensive to deploy on each desktop
- Data sharing is difficult
- Expansion is limited
- Three days to install
